The CHAPTER-3 prophylaxis study met the primary endpoint and all secondary efficacy endpoints with statistical significance. PHVS plans to submit an NDA to the FDA for the prophylaxis of bradykinin-mediated angioedema attacks in 1H27.

Key Takeaways

- Primary endpoint met, 83% attack rate reduction versus placebo (p<0.0001). 87% attack rate reduction versus placebo observed in people with HAE Type 1 or Type 2
- All secondary efficacy endpoints met with statistical significance.
- Well-tolerated safety profile of deucrictibant XR demonstrated.
- Topline data from Part 1 of CREAATE (NCT07266805) for the prevention of AAE-C1INH attacks, are anticipated in 1Q27.
- Pharvaris plans to submit an NDA to the FDA for the prophylaxis of bradykinin-mediated angioedema attacks in 1H27.

CHAPTER-3 prophylaxis study delivers. Pharvaris announced positive topline data from the CHAPTER-3 pivotal study of deucrictibant XR for prophylaxis of HAE attacks (press release, presentation, see our pulse after the readout HERE). The primary endpoint was met, with 83% attack rate reduction versus placebo (p<0.0001), and 87% attack rate reduction versus placebo was observed in people with HAE Type 1 or Type 2. ***We see topline data as delivering a "superior injectable-like" profile, as previewed in our note HERE. We will host a KOL call this Thursday, September 10 at 12:30pm ET to discuss the results and the commercial opportunity ahead (link HERE).***

Enzyme elevations were asymptomatic, not concerning in our view. The three participants with Grade 3 adverse events included tooth infection, and two people with liver enzyme elevation slightly above five fold increase from the upper limit. Both enzyme elevations were asymptomatic, one patient discontinued treatment and the other completed the study. There were no associated bilirubin elevations observed for either case. Possible confounding factors associated with these events include that one of the participants had fatty liver disease, and the other had previously used androgens. We note that in the Ph3 study of Orladeyo an

asymptomatic grade 4 elevation in alanine aminotransferase level was observed in a treated patient with previous androgen exposure who discontinued the study drug (link HERE). The tooth infection is not unexpected, as patients with HAE can tend to avoid dental visits. More details are expected at a future medical conference, potentially ACAAI.

AAE-C1INH opportunity under-appreciated, with topline data from Part 1 of CREAATE (NCT07266805) for the prevention of AAE-C1INH attacks anticipated in 1Q27. While epidemiological data is sparse, there could be ~1 AAE patient for every 10 patients with HAE (link HERE). If timing allows mgt. plans to include acquired angioedema data from part 1 clinical results with CHAPTER-3 data and one-year safety data from CHAPTER-4 in the prophylactic filing for bradykinin-mediated angioedema. The KOL noted that for the most part, acquired C1 inhibitor deficiency behaves clinically very much like type 1 and type 2 HAE, despite different underlying causes. Therefore, patients are managed similarly and are treated off-label in most regions of the world. The KOL sees positive readthrough from CHAPTER-3 to CREAATE.

Model updates: With positive CHAPTER-3 topline data, we increase our POS to 90% (from 75%). We add the AAE-C1INH opportunity (70% POS), with $109M risk-adjusted US and ex-US revenues in 2035. Ahead of deucrictibant IR PDUFA date of April 23, 2027, we increase our net price/dose at launch to ~$16,000 (from $12,500). We note Kalvista set a price of $16,720 per dose for Ekterly at launch (link HERE). We increase our SG&A expense trajectory ahead of potential launches. As a net result, our price target increases to $62 (from $46).

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of August 31, 2026)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

Morgan Stanley Research does not provide individually tailored investment advice. Morgan Stanley Research has been prepared without regard to the circumstances and objectives of those who receive it. Morgan Stanley recommends that investors independently evaluate particular investments and strategies, and encourages investors to seek the advice of a financial adviser. The appropriateness of an investment or strategy will depend on an investor's circumstances and objectives. The securities, instruments, or strategies discussed in Morgan Stanley Research may not be suitable for all investors, and certain investors may not be eligible to purchase or participate in some or all of them. Morgan Stanley Research is not an offer to buy or sell or the solicitation of an offer to buy or sell any security/instrument or to participate in any particular trading strategy. The value of and income from your investments may vary because of changes in interest rates, foreign exchange rates, default rates, prepayment rates, securities/instruments prices, market indexes, operational or financial conditions of companies or other factors. There may be time limitations on the exercise of options or other rights in securities/instruments transactions. Past performance is not necessarily a guide to future performance. Estimates of future performance are based on assumptions that may not be realized. If provided, and unless otherwise stated, the closing price on the cover page is that of the primary exchange for the subject company's securities/instruments.

The fixed income research analysts, strategists or economists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality, accuracy and value of research, firm profitability or revenues (which include fixed income trading and capital markets profitability or revenues), client feedback and competitive factors. Fixed Income Research analysts', strategists' or economists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

The "Important Regulatory Disclosures on Subject Companies" section in Morgan Stanley Research lists all companies mentioned where Morgan Stanley owns 1% or more of a class of common equity securities of the companies. For all other companies mentioned in Morgan Stanley Research, Morgan Stanley may have an investment of less than 1% in securities/instruments or derivatives of securities/instruments of companies and may trade them in ways different from those discussed in Morgan Stanley Research. Employees of Morgan Stanley not involved in the preparation of Morgan Stanley Research may have investments in securities/instruments or derivatives of securities/instruments of companies mentioned and may trade them in ways different from those discussed in Morgan Stanley Research. Derivatives may be issued by Morgan Stanley or associated persons.

With the exception of information regarding Morgan Stanley, Morgan Stanley Research is based on public information. Morgan Stanley makes every effort to use reliable, comprehensive information, but we make no representation that it is accurate or complete. We have no obligation to tell you when opinions or information in Morgan Stanley Research change apart from when we intend to discontinue equity research coverage of a subject company. Facts and views presented in Morgan Stanley Research have not been reviewed by, and may not reflect information known to, professionals in other Morgan Stanley business areas, including investment banking personnel.

Morgan Stanley Research personnel may participate in company events such as site visits and are generally prohibited from accepting payment by the company of associated expenses unless pre-approved by authorized members of Research management.

Morgan Stanley may make investment decisions that are inconsistent with the recommendations or views in this report.
