PHVS: CHAPTER-3 Postscript; PT to $44

Key Message: CHAPTER-3 delivered injectable-like efficacy—83% & 87% attack reduction overall & in Type 1/2 HAE patients, respectively—with the convenience of QD oral medicine. Pharvaris becomes the one-stop-shop for all things HAE, potentially increasing its strategic optionality. However, two >5x ULN transaminase elevations without bilirubin increases kept a lid on the stock despite stellar efficacy. Company described the LFTs as asymptomatic—one patient discontinued treatment and the other completed the study—with possible contributing factors including, one participant with fatty liver disease, and the other with history of androgen therapy. If these were the only two instances of LFT abnormalities, we don't foresee any labeling or commercial challenges. PT moves to $44 (from $40), which reflects our increased PoS for PHVS-719.

Valuation & Model Update

We have updated our financial model following successful CHAPTER-3 pivotal trial for deucrictibant in HAE prophylaxis. Our $44/share target (vs. $40 prior), is based on a 10-year discounted cash flow (DCF) analysis and reflects the increased 90% POS for PHVS-719 (from prior 80%). Our model applies a weighted average cost of capital (WACC) of 12.5% and assumes a terminal growth rate of -5%. We incorporate a 15% tax rate starting in 2031. For PHVS-416, we assume a probability of success (POS) of 90%.

Investment Risks

PHVS is susceptible to the same risks that apply to the entire biotech industry, including regulatory, commercial, manufacturing, financing, sales, and IP risks. Despite the successful completion of Ph 2 trials in both on-demand and prophylaxis settings, several key risks remain. These include: (1) Despite successful clinical trial, regulatory delays could delay launch; (2) HAE is a very competitive market with established segment leaders and dominated by established therapies; and (3) the potential for multiple subQ therapies in development, which are likely to be approved over the next 36 months, which could erode PHVS's market share or limit uptake of deucrictibant.
