Quantifying Orladeyo Erosion - What the Market is Implying at $8.4/sh

The #1 FAQ we get from investors regarding HAE/PHVS competition is **"what is priced in here?"**. We hear a lot of narratives (on both sides), but not a lot of #s.

Clearly at ~$8/sh, the stock is not reflecting what's in consensus models (avg analyst PT ~$20/sh). And given LOE timelines/different product growth profiles, it's hard to use peak sales multiples. You really need an accurate DCF.

So that's our goal with this note. We built a reverse engineered DCF in order to back into what is being implied by the market at the current valuation and frame risk/reward.

At $8.4/sh, mkt cap = $2.5B, and EV = $2.4B

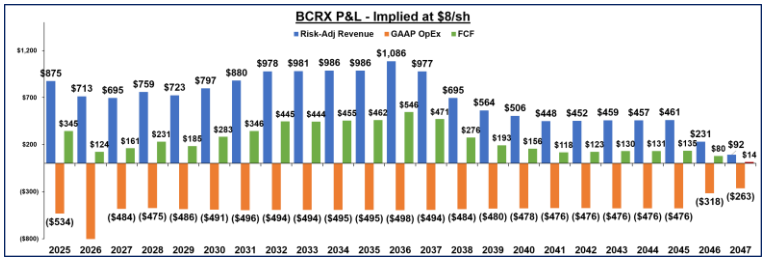

Here is how we back into $8.4/sh in a DCF:

- **Orladeyo**: peak WW sales of **$685M in '27, declining to ~$550M by '37**, before LOE in '38. Pts on paid drug peaks at ~1,200 in '27 and rolls down to ~700 (almost half of peak) by '37, reflecting prophy share erosion from 25% to low-teens. V heavy erosion
- **Navenibart:** WW unadj/risk-adj **peak sales of $530M/$460M**, which plateaus by early/mid 2030s, rather than continuing to grow. ~half of consensus
- **Operating margins**: ramps from ~high-20%'s now to 50%-55% at peak that is held steady into '37 before Orla LOE, after which margins back in the high teens

Please see the analyst certification and important disclosures on page 4 of this report. Evercore ISI and affiliates do and seek to do business with companies covered in its research reports. Investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

- **<u>Valuation</u>**: 10.5% discount rate, DCF through 2045 with no terminal growth/value beyond that
- **<u>Pipeline</u>**: ascribe 0 credit to Netherton, no additional "pipeline value" plug

To summarize, we think this stock price is reflecting ~$1B peak sales at ~60% peak operating margin = $2.4B EV and equates to a 2.2x peak sales multiple.

<u>So, what gets you upside from the current valuation, we see a few scenarios:</u>

- **Orladeyo's patient base is stickier than implied.** $8 implies the pt base falls ~40% off peak by '37. You don't need growth, even modeling patients down every year, erosion of 20% off peak instead of 40% reflects an additional $2/sh of value
- **Navenibart P3 in 3Q27** is a high PoS event and unlocks the next leg of growth for the company. Adding even $100M (risk adj from 85% to 100%) reflects an additional $2/sh of value. We have ~$1B in our base case, driving the upside in our model
- **Netherton is free,** with the readout expected by YE26

Can send this reverse DCF + our model ($17 PT) if you want to play around with them.

VALUATION METHODOLOGY

Our PT is derived from a risk-adj DCF through 2047 with a 10.5% discount rate and no terminal value.

RISKS

1. HAE competitors could take share from Orladeyo
2. Navenibart is not yet approved
3. Earlier pipeline may not succeed

Both Evercore Group and ISI UK are subsidiaries of Evercore Inc. ("Evercore"). The trademarks, logos and service marks shown on this report are registered trademarks of Evercore.

The analysts and associates responsible for preparing this report receive compensation based on various factors, including Evercore's Partners' total revenues, a portion of which is generated by affiliated investment banking transactions. Evercore ISI seeks to update its research as appropriate, but various regulations may prevent this from happening in certain instances. Aside from certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Evercore ISI generally prohibits analysts, associates and members of their households from maintaining a financial interest in the securities of any company in the analyst's area of coverage. Any exception to this policy requires specific approval by a member of our Compliance Department. Such ownership is subject to compliance with applicable regulations and disclosure. Evercore ISI also prohibits analysts, associates and members of their households from serving as an officer, director, advisory board member or employee of any company that the analyst covers.

This report may include a Tactical Call, which describes a near-term event or catalyst affecting the subject company or the market overall and which is expected to have a short-term price impact on the equity shares of the subject company. This Tactical Call is separate from the analyst's long-term recommendation (Outperform, In Line or Underperform) that reflects a stock's forward 12-month expected return, is not a formal rating and may differ from the target prices and recommendations reflected in the analyst's long-term view.

Applicable current disclosures regarding the subject companies covered in this report are available at the offices of Evercore ISI: 55 East 52nd Street, New York, NY 10055, and at the following site: https://evercoreisi.mediasterling.com/disclosure.

Evercore and its affiliates, and I or their respective directors, officers, members and employees, may have, or have had, interests or qualified holdings on issuers mentioned in this report. Evercore and its affiliates may have, or have had, business relationships with the companies mentioned in this report.

Additional information on securities or financial instruments mentioned in this report is available upon request.

Ratings Definitions

Current Ratings Definition

Evercore ISI's recommendations are based on a stock's total forecasted return over the next 12 months. Total forecasted return is equal to the expected percentage price return plus gross dividend yield. We divide our stocks under coverage into three primary ratings categories, with the following return guidelines:

Outperform- the total forecasted return is expected to be greater than the expected total return of the analyst's coverage sector.
In Line- the total forecasted return is expected to be in line with the expected total return of the analyst's coverage sector.
Underperform- the total forecasted return is expected to be less than the expected total return of the analyst's coverage sector.
Coverage Suspended- the rating and target price have been removed pursuant to Evercore ISI policy when Evercore is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances.*
Rating Suspended- Evercore ISI has suspended the rating and target price for this stock because there is not sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, a rating or target price. The previous rating and target price, if any, are no longer in effect for this company and should not be relied upon.*

*Prior to October 10, 2015, the "Coverage Suspended" and "Rating Suspended" categories were included in the category "Suspended."

FINRA requires that members who use a ratings system with terms other than "Buy," "Hold/Neutral" and "Sell" to equate their own ratings to these categories. For this purpose, and in the Evercore ISI ratings distribution below, our Outperform, In Line, and Underperform ratings can be equated to Buy, Hold and Sell, respectively.
